INTRODUCTION

The aim of this document is to gather, analyze and give an in-depth insight into the complete **Management Employee Portal** by defining the problem statement in detail. Nevertheless, it also concentrates on the capabilities required by employees and their needs while defining high-level product features.

As an organization we are growing and our backend team using different tools for their operational works like timesheets, billing statements, resource management sheets, update skills and resume formatting, interview feedbacks, etc. This is becoming a tedious process day by day and taking a lot of bandwidth to oversight other engagements.

Management Employee Portal will help us to make things simpler and easy as a clear understanding for all these backend works.

PURPOSE OF THE DOCUMENT

The purpose of the document is to collect and analyze all assorted ideas that have come to define the system, its requirements with respect to consumers. Also, we shall predict and sort out how we hope this product will be used in order to gain a better understanding of the project, outline concepts that may be developed later, and document ideas that are being considered but may be discarded as the product develops.

In short, the purpose of this Software Requirements Specification (SRS) document is to provide a detailed overview of our software product, its parameters, and goals. This document describes the project's target audience and its user interface, hardware and software requirements. It defines how our team, and audience see the product and its functionality.

Nonetheless, it helps any designer and developer to assist in the software development lifecycle (SDLC) processes.

SCOPE OF THE DOCUMENT

The scope of the document includes automating the following processes for Management Employee Portal

- Management Employee Portal Creation
 - Sysadmin Creation
 - Creating/Removing the Roles
 - Creating/Removing/Activating the Users
